

The Effects of Emotional Intelligence in Architectural Education

By Emel Birir

LAP Lambert Academic Publishing. Taschenbuch. Book Condition: Neu. 220x150x mm. Neuware - The purpose of this study is to research the concept of achievement orientation in architecture design education throughout the education periods of students, and to render the findings sharable with students and education professionals. The findings were gathered through measuring the intrinsic motivations of students in their first year of architectural education and comparing the effect of these measurement results on the students graduation year. The reason why the study steers towards the field of psychology is the thought that motivation is a necessary element for achieving success and affects architectural design education in a fundamental way. Motivation is a part of the emotional intelligence, an area which is now measurable in psychology. 56 pp. Englisch.

Reviews

This composed ebook is wonderful. It really is written in basic words rather than hard to understand. You may like the way the writer composed this pdf.

This book can be well worth a go through, and a lot better than other. It is written in simple words and phrases and not confusing. It's been printed in an exceptionally simple way in fact it is merely right after I finished reading through this pdf by which basically changed me, modify the way I think.
