

Red Kangaroo: The World's Largest Marsupial (Hardback)

By Natalie Lunis

Bearport Publishing, United States, 2010. Hardback. Book Condition: New. 257 x 206 mm. Language: English . Brand New Book. An adult male red kangaroo is taller than most people. It can stand up to 7 feet (2.1 m) tall and weigh up to 205 pounds (93 kg), which makes it the world's largest marsupial. Despite the fact that it grows to such a big size, a newborn red kangaroo is tiny. The joey is about one inch (2.5 cm) long, or the size of a grape. It's hard to believe that such a little baby will grow up to be a king-sized kangaroo! In *Red Kangaroo: The World's Largest Marsupial*, large color photos and grade-appropriate text will engage young readers as they learn about the natural habitat, physical characteristics, diet, life cycle, and behavior of this super-sized kangaroo. A comparison diagram is also included to show readers the animal in relation to a familiar object.

Reviews

Thorough manual for ebook fans. it had been writtern quite properly and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book.
