Pursuant to a congressional request, GAO provided information on state initiatives concerning health care access and affordability, and federal barriers which limit states progress toward achieving universal health care. GAO found that: (1) states have moved decisively to devise plans to expand access to health insurance and control increases in health costs, but have been hindered by the restrictions of the Employee Retirement Income Security Act of 1974 (ERISA), which prevents states from exercising full control over all employer-provided insurance; (2) working within ERISA constraints to achieve universal health coverage, some states have created play or pay systems, which hinge on the states power to tax, but implementation of these systems has been delayed because the outcome of laws for implementing these systems is uncertain; (3) other state programs have targeted specific uninsured groups, such as low-income children and adults, but have had limited success because of budgetary constraints; (4) Hawaii has the lowest uninsured rate of all states, largely due to a previously enacted law which exempts Hawaii from the ERISA preemption provision; (5) many states continue to develop proposals...
